Setting the scene

Our approach is to create beautiful, inspiring appliances that change the perception of a traditional electric fire.

Our unique TriLight technology provides multi angled, fully customisable dynamic LED lighting to create thousands of unique colour and tonal combinations to the flames and fuel bed. Each can work in harmony with one another or can work independently, creating unique combinations and a truly unique atmosphere, all at the touch of a button.

To provide an insight into the possibilities, all Rinnai ES Series electric range fires come with 6 programmed themes to highlight some of the fascinating lighting combinations that can be created, these are:

Autumn Campfire

Ember Glow

Inferno

Noir

Fire & ice

Nebula

Instant heat
at your fingertips

Part of the Rinnai design ethos is to ensure that all appliances offer clear and simple controllability. Whilst functionality may have advanced and become more dynamic, we believe that intuitive interaction is paramount.

The Rinnai ES fires can be conveniently controlled in three ways:

• Manually using the multi-function panel discretely located on the appliance

• With the intuitive remote-control handset

• Through your smart device (such as phone or tablet) using Wi-Fi connectivity

With built in Wi-Fi connectivity, enhance your user experience with our smart app enabling you to control your appliance from anywhere. The app allows you to set tailored programs, schedule on/off times, set temperatures, design custom light effects, plus much more.

The quick start heat option allows you to select low heat, high heat, or cool blow at the touch of a button. Whilst adaptive smart heating allows you to schedule the exact time and date you wish to heat your room, automatically adjusting the environment to reach and maintain the desired temperature.

Smart technology

With Rinnai, the combination of functionality with applied smart technology creates the ultimate home heating experience. Your appliance will synchronise with your smart device, such as phone or tablet, putting you in complete control. The latest sensor technology helps to create our most efficient appliance ever, ensuring that the room is heated to the correct temperature at the correct time with optimum energy usage.

We are committed to a sustainable future, ensuring that our appliances make the most efficient use of energy. All Rinnai appliances benefit from temperature detection and regulation technology; if there is sudden drop in room temperature, perhaps caused by an open window or door, the appliance will temporarily deactivate any heating functions to avoid energy wastage and will reactivate when the window or door is closed.
For further information speak to your Rinnai Specialist Fire Dealer.
